

Champions for Clean Air

SDG&E® Electric Vehicle Rebate

We'd like to celebrate the service of our teachers and first responders by offering them a \$1,000 point-of-sale rebate toward the purchase or lease of a new all-electric or plug-in hybrid vehicle.

This is in addition to the up to \$10,000 in state cash rebate and federal tax credit incentives available.

How to qualify

This \$1,000 point-of-sale rebate is only being offered to teachers and first responders who live and work in the SDG&E® service territory.

Teacher eligibility

- Must be a credentialed teacher in the State of California
- Must be currently employed at an elementary, middle or high school in the SDG&E service territory.
- Be able to show a recent paystub (3 months or less) verifying employment status
- Household must be an SDG&E customer

First responder eligibility

- Must be currently employed as a police officer, sheriff, lifeguard, firefighter or emergency medical technician in the SDG&E service territory.
- Be able to show a recent paystub (3 months or less) verifying employment status
- Household must be an SDG&E customer

How to apply

- Have the proper documentation
 - A recent paystub (3 months or less)
 - A copy of your SDG&E bill
- Then visit sdge.com/evrebate and click "Apply"
- You'll be taken to our partner site, Plug-in America, to fill out your application and submit your documentation.

- Plug-In America will review your application and confirm your eligibility. If you qualify, they will provide you with a verification code to bring to the dealer.
- Before using your code, please call your dealership to confirm if they are participating in the Champions for Clean Air program. The rebate is being offered on a **first-come, first-served basis and is good while limited funds are available.**

Why are drivers making the switch to EVs?

The San Diego region is home to more than 24,000 electric vehicles. There are many reasons drivers are making the switch:

- Lower fuel costs
- All-electric cars have fewer parts which result in no oil changes and less maintenance.
- Clean fuel, clean air. Since all-electric cars produce zero emissions, this helps to reduce greenhouse gases and improve air quality. This is in addition to 43 percent of our region's grid which is made up of renewable energy, with no coal.
