 #CCPS19

TUESDAY, SEPTEMBER 17, 2019 | NATIONAL UNIVERSITY SPECTRUM CENTER

## BREAKOUT SESSION OVERVIEW

**Breakout Session A:** Room 116: Ensuring Student Success in a Transforming World  
**Presented by:** Rob Atterbury, Director, District and Regional Support, ConnectEd: The National Center for College and Career  
**Focus:** Changing what and how we teach today to ensure our students future success in college and career while meeting the new accountability measures.

**Breakout Session B:** Room 131: Making Industry Experiences an Easier Lift  
**Presented by:** San Diego County Office of Education College and Career Readiness Team  
**Focus:** : Developing work-based learning opportunities that are intentionally designed to ensure students are prepared for future career options is essential in our K12 system. Together we will look at ways to improve interactions with industry professionals and streamline industry experiences for both employers and educators.

**Breakout Session C:** Room 133: Redesigning the CTE/STEM Learning Space with a Focus on College and Career Readiness  
**Presented by:** Gabe Soumakian, Superintendent in Residence  
**Focus:** The impact of technology on the jobs-of-the-future has placed a strong expectation for the classroom-of-the-future to redesign the CTE/STEM learning space to focus on College and Career Readiness. Learn about model CTE middle schools who have implemented a College and Career Ready program to improve student's ability to make better high school pathway choices. Learn how schools are redesigning the learning environment to enhance student performance and prepare students by creating a pipeline to the next generation workforce with the necessary skills business requires.

**Breakout Session D:** Room 114: Leveraging Data for Cradle to Career Success  
**Presented by:** Liz Walburn, Regional Vice President, Hoonuit; Christian Shannon, Administrator, Support Services, Kern County Superintendent of Schools  
**Focus:** In an effort to push toward the goal of closing the student achievement gap, Kern County Superintendent of Schools (KCSOS), launched the Kern Education Pledge. One of the early initiatives of this innovative community partnership is to implement a comprehensive data warehouse solution. KCSOS partnered with data solution, Hoonuit, to develop the Kern Integrated Data System (KIDS), that allows education agencies in Kern County to use data to determine specific early interventions for students, highlight professional development needs and identify bright spots in the County that can be replicated and strengthened. This session will explore strategies, best practices and lessons learned on how to begin surfacing data across your community to empower educators, parents and community members to help every child reach their full potential.

Pathways Summit

# Summit Agenda

TUESDAY, SEPTEMBER 17, 2019 | NATIONAL UNIVERSITY SPECTRUM CENTER

## BREAKOUT SESSION OVERVIEW

BLOCK 2

**Breakout Session E:** Room 116: Career Exploration and Closing the Skills Gap for Lifelong Learners with Journeys Map

**Presented by:** Scott Sibley, Director, Journeys Map

**Focus:** Journeys is your interactive learning map to explore life's possibilities, plan with confidence, and succeed. Exploring pathways in K-12, college, career, military and certification has never been easier. Journeys user-centric map highlights the entire learning landscape and gives every individual the power to find and follow their own personalized pathway. Come see a live demo and learn how you can start using for FREE today!

**Breakout Session F:** Room 131: Evolution and Updates on the World Of Work

**Presented by:** Karen Minshew, Assistant Superintendent, Educational Services, Cajon Valley Union School District

**Focus:** This session will showcase the expansion of student access through community partners; provide initial research findings on the World Of Work; and share an update on expanded program curriculum including social-emotional learning and personal finance.

**Breakout Session G:** Room 133: Building a Graduate Profile for the Jobs of the Future

**Presented by:** San Diego County Office of Education College and Career Readiness Team

**Focus:** Ensure students are building skills to ensure success in the workplace by building a graduate profile with industry input. Join in for a conversation between industry and education on identifying and incorporating the essential skills of the workplace into the student experience.
